

## TDG 3-Day Risk Management Workshop

Risk Management is an interactive workshop on current topics in risk management and its application in contemporary business particularly in a project management environment. Participants can submit suggested topics or issues three weeks prior to the workshop for inclusion and discussion in the workshop content.

Key questions addressed will include:

- What are the steps to effective risk identification and management?
- What do I need to do to gain the efficiencies and effectiveness desired in project execution?
- How do I manage a “Top Ten” Risk List?
- What techniques can I use immediately that will make a difference?

This workshop is based on the PMI PMBOK® Guide, Current Risk Management Theory, and Industry Best Practices and includes: Up to 40 participants in workshop format; Project Management Institute (PMI) Project Management Body of Knowledge PMBOK® Guide (ANSI Standard) and the text *Proactive Risk Management* by Preston G. Smith & Guy M. Merritt; Workshops Handouts; Exercises; a PMP certified, knowledgeable, and professionally experienced instructor. Location can be on-site at client facilities or at a local facility offsite. Fee: Please call for pricing. GSA pricing available for government clients. This course is worth 24 PMI Professional Development Units (PDUs).

Risk Management Competency Assessment Tool can be administered three weeks prior to the course for an additional fee. Requires Internet or Intranet website address for participants to access tool or can be administered using CD-ROMs. The instructor will evaluate responses, tailor instruction based on the responses, and provide overall feedback to course participants. A post workshop participant assessment is also available.

This course is based on the PMI PMBOK® Guide Risk Processes.
